Subject: Draft Summary of Methods

Cindy,

Here is the email and list of supporting documentation for the summary of methods. I will need to upload the files you sent to Jeanne on Glycols & Quality Manual.

In response to Cabot's request for the list of analytical methods per analyte and respective method detection limits, I am providing you with a summary table and a set of documents.

Included in the response are the following:

- Method List for Table 1 from Dimock Residential Groundwater Site Sampling Plan - This table contains the sample preparation and analytical methods for all parameters and includes links to the actual methods along with a reference to the laboratory's SOPs. (attached to this email)
- Analyte list with reporting limits (attached to this email) (Excel spreadsheet with multiple tabs)
- Region 3 Quality Manual (located on FTP site in the EPA_Laboratory directory)
- Method SOPs (located on FTP site in the EPA_Laboratory directory)
- Glycol Analytical Procedures (SOP is in draft; write-up of procedures are located on FTP Site in the EPA_Laboratory directory)
